Location: Chennai, India(WFH)

Software Tester - Batch of 2023-2024

Zynofus Technologies Private Limited is seeking a detail-oriented and dedicated Software Tester to join our Quality Assurance (QA) team. As a Software Tester, you will play a vital role in ensuring the quality and reliability of our software products through rigorous testing processes. You will work closely with development teams to identify, report, and help resolve issues, contributing to the delivery of high-quality software solutions to our clients.

Responsibilities:

- Collaborate with software developers, business analysts, and other stakeholders to understand software requirements and design comprehensive test cases and scenarios.
- Execute test plans, test cases, and test scripts to thoroughly evaluate software functionality, performance, and reliability.
- Identify and report defects and issues using issue tracking tools, and work with development teams to ensure timely resolution.
- Participate in the design and implementation of test automation scripts to improve testing efficiency and coverage.
- Conduct manual testing as needed, especially for complex scenarios and exploratory testing.
- Perform regression testing to ensure that previously identified defects have been fixed and that no new issues have arisen.
- Participate in cross-functional discussions to provide feedback on product quality and potential areas for improvement.
- Collaborate with the QA team to continuously enhance testing processes, methodologies, and tools.
- Stay updated with industry best practices and emerging trends in software testing and quality assurance.

- Communicate effectively with team members and stakeholders to ensure a clear understanding of testing goals and results.

Qualifications and Requirements:

- **Bachelor's degree in Computer Science, Software Engineering, or a related field.**
- Previous experience in software testing or quality assurance roles is a plus.
- Familiarity with various testing methodologies, such as manual testing, automated testing, regression testing, and performance testing.
- Knowledge of testing tools and frameworks, such as Selenium, JUnit, TestNG, or similar tools.
- Strong analytical and problem-solving skills to identify and isolate defects effectively.
- Excellent communication skills, both written and verbal, to convey testing results and collaborate with team members.
- Detail-oriented mindset with the ability to meticulously document and track test cases and results.
- Familiarity with programming languages and scripting is advantageous.
- Enthusiasm for learning and adapting to new technologies and tools.
- ISTQB or other relevant software testing certifications are a plus.

Compensation and Benefits:

Annual Package: Rs. 3.2 lakhs per annum

- Competitive salary and benefits package
- Opportunity to work on cutting-edge projects
- Collaborative and supportive work environment
- Opportunities for professional development

Working Conditions	Details
Work hours	The typical work hours for Software Engineers at Zynofus Technologies Private Limited are 9:00 AM to 6:00 PM, Monday through Friday. However, there may be some flexibility in the hours, depending on the project.
