

About Company-

We at Exegi Batteries, customize the lithium ion battery packs according to the application and product requirements of the customers.

Lithium ion battery integration requires a special set of skills and expertise to optimize the performance and battery life. We at Exegi Batteries, using the most advanced technology, deliver the best quality battery packs.

We provide an unmatched combination of technology & innovation for power solutions. Over a period of time, we have emerged ourselves as the most economic power solution provider.

Our batteries are safe to use, better performance, higher shelf life and a very low maintenance cost. We are known for providing custom lithium battery solutions for Solar, EV, Medical, Aerospace & Defence, Industrial and LED Lighting applications. We also provide the complete range of material that are required for designing a battery pack. We have a dedicated R&D team so as to provide excellence by continuous improvement and innovations.
